## PECO Pallet Wins Environmental Sustainability Awards

June 30, 2014 (Irvington, NY): PECO Pallet, Inc. was recently awarded two sustainability awards by leading industry publications. PECO was named a “Top Green Provider” by *Food Logistics* magazine, which recognizes companies who are enhancing sustainability within the food and beverage industry. PECO was also honored by the editors of *Inbound Logistics* as a 2014 Green Supply Chain (G75) partner, in recognition of the company’s sustainable supply chain, logistics, and transportation practices. PECO Pallet is profiled in the June issues of both publications.

As the North American leader in pallet rental services, PECO Pallet provides high-quality wood pallets for grocery and consumer goods manufacturers throughout the U.S., Canada, and Mexico. PECO’s sturdy block pallets are built from responsibly forested timber and are constantly reused, repaired, and recycled. Companies who utilize PECO’s pooled pallets can eliminate the waste, inefficiency, and safety problems associated with single-use pallets.

Adrian Potgieter, PECO Pallet’s Senior Vice President of Sales, said, “Environmental sustainability is at the very core of our company. PECO was built on the basic idea of reusing pallets to reduce waste, and we are proud of this double recognition from both *Food Logistics* and *Inbound Logistics*. We encourage companies who want to ‘go green’ to think about switching to ‘red’ as a more sustainable shipping solution.”

The *Food Logistics* Top Green Providers list focuses on sustainability in the global food supply chain with profiles of companies who are exceeding industry standards in their sector. This year’s list includes food producers and manufacturers, 3PLs and transportation and logistics providers, equipment manufacturers, and others whose products and services are driving sustainability from farm to fork.

*Inbound Logistics*’ G75 Green Supply Chain Partners highlights sustainability leaders in the logistics and transportation sector. The selection process evaluates companies in three areas: participation in public-private partnerships; corporate sustainability initiatives; and collaborative customer-driven projects. Within this context, four benchmarks carry weight in IL’s decision-making: measurable green results, sustainability innovation, continuous improvement, and industry recognition.

**About PECO Pallet:**

PECO Pallet is the North American leader in pallet rental services and provides millions of its red block pallets to major grocery and consumer goods manufacturers throughout the U.S., Canada, and Mexico. PECO Pallet's tremendous growth over the last decade reflects the company's overall commitment to exceptional quality and customer service. PECO is headquartered in Irvington, New York and maintains over 580 service centers and manufacturing plants throughout North America. For more information about PECO Pallet, visit [www.pecopallet.com](http://www.pecopallet.com).

**About *Food Logistics*:**

*Food Logistics* is published by Cygnus Business Media, a leading diversified business-to-business media company. The publication serves the information needs of executives involved in various aspects of the global food and beverage supply chain. Through our print and online products, we provide news, trends, and best practices that help more than 24,000+ grocery and foodservice suppliers, distributors, and retailers make better business decisions. Visit us online at [www.foodlogistics.com](http://www.foodlogistics.com).

**About *Inbound Logistics*:**

Since its inception in 1981, *Inbound Logistics*' educational mission is to illustrate the benefits of demand-driven logistics practices, give companies the knowledge to help them match the inbound flow of materials to their demand, and align their business process to support that shift. *Inbound Logistics* offers real-world examples and decision support to guide businesses to efficiently manage logistics, reduce and speed inventory, and offset rising transport costs, supporting business scalability across their value chain. More information about demand-driven logistics practices is available at [www.inboundlogistics.com](http://www.inboundlogistics.com).
